

# SO YOU WENT TO

## 5 Mind-Blowing Moments

To Be A Futurist:

Look for Signals

Collect Signals

Combine Signals to Make New (Whatevers)

"Imagining the Future prepares you to be more creative." McGonigal

Be a flashlight for purpose

The average brain reflects nobody.

It's about the design of systems, not just design of buildings.

## 3 Ideas for Campus or District Improvement

(Include ideas for HOW and WHY.)

Show Lizzie Velasquez's film A Brave Heart  
How: An assembly  
Why: Middle school students need to continually be aware of the power of their words and actions

Begin to teach coding as part of a class or as an elective  
How: create the proposal for School Board approval  
Why: Coding is critical for kids to be able to design apps, websites, etc

Begin an entrepreneurship program for middle school kids  
How: Create an elective for this class  
Why: Our kids have amazing ideas and it would be great if school could include connections to some of the outside interests of the kids. It's the integration of the real world and academic worlds....
